

Construction documentation Fast, effective, & 3D

Replace thousands of photos with a simple, realistic 3D building model.
Communicate current conditions, expedite decision making,
and use for complete construction documentation.

3D CONSTRUCTION DOCUMENTATION WITHOUT THE HEADACHE

With only a few simple scans, Matterport can give you quick and effective milestone documentation. With both 2D photography and 3D data, a Matterport Space is the best way to track key milestones and discover issues early.

REPLACE THOUSANDS OF PHOTOS

A single Matterport Space can replace thousands of traditional 2D photos. With the immersive 360° walkthrough, documentation is both engaging and enjoyable. On the Pro2, you can even zoom in and read detailed labels.

For when you absolutely need 2D photos, they're easy to download from Matterport. You can also get **reflected ceiling plan images and high resolution floorplan images** for even richer documentation.

MEASURE, ANNOTATE, & COMMUNICATE

Get stakeholders on the same page and give them the detail they need. Tag complicated areas with more information, such as MEP details beneath drywall. Highlight what's most important with a Guided Tour.

Get the **point cloud** that accurately details current conditions and then export to Revit to compare with the original design.

LEVERAGE FOR THE LONG TERM

Finally, turn over your documentation to the building owner for long-term facilities management. The owner will be pleased to have this easy-to-use treasure trove of information for future maintenance and renovations.

It's not just 3D Showcase online. There's a lot of [Matterport assets that you can download](#) and include as part of your physical or digital turnover package.
